

Gain a Competitive Edge in the Global Aquaculture Industry with Sightline EDM

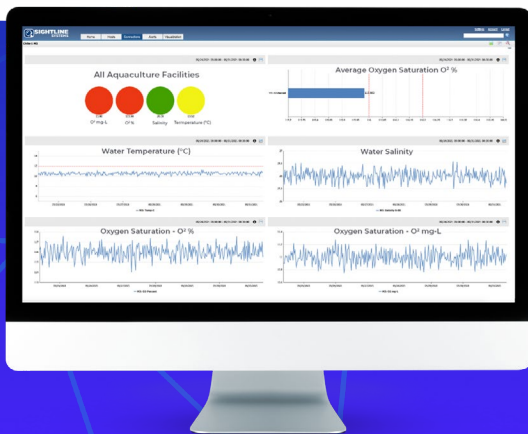

In aquaculture, one small anomaly can have dire business outcomes. Sightline EDM is a comprehensive real-time data monitoring and analytics solution that lets you leverage the data from your operation to prevent kill-off, improve fishery conditions and increase efficiency and production to gain a competitive edge in the global aquaculture industry.

Continuous Water Monitoring

Your aquaculture operations never stop and Sightline EDM's round-the-clock monitoring and custom alerts give you time to act before issues like dissolved oxygen level drops, algae blooms, or temperature fluctuations become too costly.

Real-Time Compliance Reporting

Sightline EDM simplifies and streamlines compliance with the intricate web of shifting global regulations on aquaculture with real-time monitoring and compliance reporting.

Operational Snapshot at a Glance

Get a whole-picture, easy-to-understand snapshot of hatcheries, feed requirements, processing operations, and more within Sightline EDM's dashboard.

Visualize the processing & packaging operations across facilities, gain actionable insights as well as efficiency opportunities, and reduce downtime.

Discover What Sightline Can Do For You

Find out why aquaculture and other operations in 15+ countries rely on Sightline EDM to maximize yields and stay competitive. Learn more at sightline.com.
